Dear Clients!

Please be noted that the cost of surgical treatment is compiled without taking into account the particular circumstances of the definite case. For medical reasons the scope of the operation can be expanded, so the final cost of surgical treatment may differ from indicated in the Price list.

OUR SPECIALISTS

Obstetrician-gynecologist _____	<i>Kharchenko Andrei Gennadyevich</i>
Obstetrician-gynecologist _____	<i>Tsai Natalya Alekseevna</i>
Anesthesiologist _____	<i>Zelichenko Dmitriy Leonidovich</i>
Anesthesiologist _____	<i>Moldobaeva Nurgul Tologonovna</i>
Gynecologist - endocrinologist _____	<i>Sardalbekova Gulnara Kamilovna</i>
Gynecologist - oncologist _____	<i>Lim Eugeniia Fedorovna</i>
Senologist _____	<i>Buiuklianov Sergei Ishkhanovich</i>
Urologist andrologist _____	<i>Botobaev Asylbek Aidarbekovich</i>
Urologist andrologist _____	<i>Mukanbaev Nurdin Kasymbekovich</i>
Surgeon _____	<i>Salybaev Avtandil Zholdoshibekovich</i>

DEPARTMENT OF ANAESTHESIOLOGY AND REANIMATION

Extended artificial pulmonary ventilation (12 hours), replenishment of pathological losses, correction of circulating blood volume (1 bed-day) --	13000
Combined organ pathology, aggravated initial status, the postoperative period, highly traumatic interventions requiring artificial pulmonary ventilation (1 bed-day) -----	14500
Secondary organ damage, complications and associated pathology, correction of protein metabolism and circulating blood volume (1 bed-day)-----	17500
Multiple organ failure, shock with replacement of vital functions (1 bed-day)-----	23000
Installing an epidural catheter -----	1000
Catheterization of the central vein (using a disposable set) -----	900
Complex of services for the provision of prolonged epidural anesthesia ----	1000
Anesthesia support (general anesthesia) for the first hour -----	5000
Anesthesia support (medicated sedation) one hour -----	3500

DEPARTMENT OF GYNECOLOGY

Ovarian cystectomy -----	33000
Wedge-shaped resection of ovary -----	34000
Uterine amputation without appendages (2-3 c/d) -----	37000
Uterine amputation with appendages (2-3 c/d)-----	40000
Uterine amputation (Performing surgery with technical difficulties due to adhesions and (or) specific anatomy) -----	54000
Vaginal hysterectomy (Mayo) -----	47000
Extirpation of the uterus without appendages -----	42000
Extirpation of the uterus with appendages -----	47000
Extirpation of the uterus with appendages enlarged. Subtotal resection of the greater omentum -----	55000
Conservative myomectomy (enucleation of myoma nodules) -----	38000
Unilateral salpingo-oophorectomy -----	32000
Separate diagnostic curettage of the endometrium (without anesthesia) -----	6000
Separate diagnostic curettage of the endometrium (with anesthesia) -----	9500
Bartholin gland cyst removal -----	16000
Plastics when the prolapse of the uterine walls and vagina -----	40000
Plastic surgery of the anterior and posterior walls of the vagina with mesh endoprosthesis (without the cost of an endoprosthesis) -----	45000
Extirpation of the cervical stump-----	44000
Amputation of the cervix -----	27000
Resection of the labia minora -----	22000
Sterilization of a woman -----	32000
Plastics of the fallopian tube -----	44000
Salpingectomy (Tubectomy in tubal pregnancy) -----	33000
Removal of the ovum from the fallopian tube-----	35000
Adhesiotomy, dissection and emptying serocele -----	36000
Infertility surgery -----	36000
Surgical treatment of stress urinary incontinence -----	42000

DEPARTMENT OF UROLOGY

Retrograde pyelography (without the cost of contrast) -----	4000
Cystoscopy -----	4000
Trocar cystostomy -----	9000
Bladder Biopsy -----	4500
Pyelonephrolithotomy -----	47000
Nephrolithotomy -----	47000
Ureterolithotomy -----	40000
Bringing down testicles -----	17000
Plastics of testicular membranes (Winckelmann operation) -----	17000
Exsection of testicular membranes (Bergman operation) -----	17000
Circumcision up to 3 years (without the cost of anesthesia) -----	2500
Circumcision older than 3 years (without the cost of anesthesia) -----	4000
Orchiectomy -----	22000
Excision of the epididymis -----	25000
Exsection of the epididymis cyst -----	25000
Vasoresection (bilateral) -----	12000
Percutaneous puncture nephrostomy (without the cost of a set) -----	10000
Removal of bladder stones -----	25500
Bladder fistula closure -----	25000
Reconstructive surgery on the penis -----	35000
Exsection of a paraurethral cyst -----	15000
Exsection of urethral polyps -----	10000
Exsection of renal cyst by lumbotomic access -----	42000
Meatotomy -----	4000
Ligation and transection of the testicular vein (Varicocele) -----	25000
Puncture sclerosing of a kidney cyst under ultrasound control (without the cost of consumables) -----	9000
Sling surgery for incontinence TVT-O (without the cost of consumables) -----	32000
Testicular Prosthesis (without the cost of consumables) -----	15000

DEPARTMENT OF SURGERY

HERNIA

Surgical treatment of umbilical hernia -----	32000
Surgical treatment of abdominal white line hernia-----	32000
Surgical treatment of inguinal-femoral hernia -----	33000
Surgical treatment of scrotal hernia -----	35000
Surgical treatment of recurrent umbilical hernia-----	37000
Surgical treatment of recurrent abdominal white line hernia -----	37000
Surgical treatment of recurrent inguinal-femoral hernia -----	35000
Strangulated hernia (without intestinal resection)-----	from 40000
Strangulated hernia (with intestinal resection, 7 c/d) -----	from 60000
Surgery for small and medium postoperative hernia (complex form) ----	42000
Surgery for a large postoperative hernia -----	47000

The cost of the endoprosthesis (mesh) for the surgical treatment of hernias is determined individually

HEPATOBILIARY DISEASES

Abdominoplasty -----	40000
Splenectomy-----	40000
Cholecystectomy -----	37000
Cholecystectomy (technically difficult) -----	from 40000
Application of the anastomosis of the gallbladder or bile duct -----	40500
External drainage of the bile duct-----	30000
Application of cholecysto-anastomosis with interintestinal anastomosis -	42000
Hepatostomy -----	24000
Choledocholithotomy-----	35000
Resection of the liver segment(s)-----	60000
Enucleation of liver tumors -----	63000

GASTROINTESTINAL DISEASES

Gastrectomy (Billroth-I) -----	50000
Gastrectomy (Billroth-II) -----	65000
Resection of the surgically operated stomach -----	70000
Pyloroplasty -----	40000
Gastric or duodenum ulcer suturing -----	47000
Small intestine's defect suturing -----	30000
Gastrectomy -----	80000
Gastroenterostomy -----	55000
Gastrostomy -----	25500
Appendectomy (1 c/d) -----	from 25000
Disconnection of adhesions with adhesive obstruction -----	42000
Disconnection of adhesions with adhesive obstruction (technically difficult) -----	55000

THYROID DISEASES

Hemithyroidectomy -----	37000
Thyroidectomy -----	42000
Subtotal resection of the thyroid gland -----	37000

OTHER TYPES OF OPERATIONAL INTERVENTIONS

Excision of the retroperitoneal neoplasm -----	50000
Peritoneal drainage -----	10500
Hemorrhoidectomy -----	40000
Exsection of adrectal fistula (dermoid cyst) -----	32000
Hemicolectomy with application of colostomy -----	60000
Hemicolectomy with application of a colonic anastomosis -----	from 70000
Breast resection (gynecomastia) -----	22000
Unilateral adrenalectomy by laparotomy access -----	42000

DOCTORS' ROUND, WARDS

Accommodation in the hospital ward for more than 3 days (every 1 day)	5000
Individual nurse's station 1 day -----	2000
Emergency operations (by cito) -----	+15%
